Listening to the amp immediately made a dramatic and positive improvement in my system. The CA-400 is SO much more musical than the M-1000's.

NOTE that I only bypassed the AUDIO section of PC-29: the filters and the two-transistor stage that serves to raise the input impedance of the Stereo 400. If you do this, the Stereo 400 will no longer be usable with the Dynaco PAS preamps; its input impedance will be too low.
