LibGen is a unique concept in the category of eBooks, as this Russia based website is actually a search engine that helps you download books and articles related to science. It allows you to download paywalled content for free including PDF downloads for the stuff on Elsevier's Science Direct website. Even though the site continues to face legal issues due to the pirated access provided to books and articles, the site is still functional through various domains.

## How Bees Make Honey Lesson

What Bees Need to Make Honey. Bees need nectar and water to make honey. They need a place to live, such as the hive. They also need pollen. Adult bees don't need much pollen. However, bee larvae need lots of pollen because of the high protein content. Bees have other needs too. They need vitamins, carbohydrates, lipids, proteins, and minerals.

Bees eat nectar which they turn into honey. As the bees fly from flower to flower to collect nectar, pollen from many plants gets stuck on the bee's pollen baskets (hairs on the hind legs). The pollen gets rubbed off on other flowers which pollinates the flowers (fertilizing them and producing seeds). There are three types of honeybees:
