Probability of Events Simple events can be assigned a probability (relative frequency of its occurrence in a long run). It's obvious that each of these probabilities must be a non-negative number. To find a probability of any other event A(not necessarily simple), we then add the probabilities of the simple events Aconsists of. This immediately

Probability theory began in seventeenth century France when the two great French mathematicians, Blaise Pascal and Pierre de Fermat, corresponded over two problems from games of chance. Problems like those Pascal and Fermat solved continued to influence such early researchers as Huygens, Bernoulli, and DeMoivre in establishing a mathematical theory of probability. Today, probability theory is a ...
