The organic chemistry practice exam and test bank is here to help you with organic chemistry. Practice problems and exams are the best way to study for exams and to help you succeed in this course. This is huge for college students. The test bank above is classified by semester, difficulty, where the exam came from, and what topics it covers.

Problems. In each of these problems you are given the IR, NMR, and molecular formula.

Using this information, your task is to determine the structure of the compound. The best approach for spectroscopy problems is the following steps: Calculate the degree of unsaturation to limit the number of possible structures.
