Not really in 6 months there will be a simple sidegrade to what ever replaces Centos as the free RHEL. Centos was a pretty good clone before Red Hat took over. Or you could just switch to Oracle Linux. It's free and compatible. Although it is Oracle...

CentOS Linux is dead—and Red Hat says Stream is “not a ...

Red Hat Enterprise Linux (RHEL) 7.6 Beta was released a few days ago and one of the first new features I noticed is Podman. Podman complements Buildah and Skopeo by offering an experience similar to the Docker command line: allowing users to run standalone (non-orchestrated) containers. And Podman doesn't require a daemon to run containers and pods, so we can easily say goodbye to big fat ...

Intro to Podman (Red Hat Enterprise Linux 7.6 Beta) - Red ...

Due to policies for Red Hat family distributions, the PostgreSQL installation will not be enabled for automatic start or have the database initialized automatically. To make your database installation

complete, you need to perform the following steps, based on your distribution: For RHEL / CentOS / SL / OL 6

PostgreSQL: Linux downloads (Red Hat family)

Default RedHat Enterprise Linux comes with SELinux set to 'enforcing'. But this may cause user problem accessing web content placed at directory other than the default directory (/var/www/html) or other access problem.
