Most central air conditioners are connected to a home's forced-air distribution system. Thus, the same motor, blower, and ductwork used for heating are used to distribute cool air from the air conditioning system. When a central air conditioner is operating, hot air inside the house flows to the furnace through the return-air duct.

Introduction to How to Repair Central Air Conditioners ...

You've come to the right place for air conditioner repair help. With our troubleshooting guide, you may be able to fix your air conditioner affordably and quickly. Here's how: Chose a symptom that describes the problem, and then read through the possible causes. It might take a little investigative work to zero in on just the right one.

Always inspect pressure gauges to ensure the needles rest as zero on both low and high sides on atmospheric pressure. If the needle(s) do not rest on zero, remove the hoses, open both taps, detach the dial face and gently turn the adjustable screw until the needle(s) rest on zero. Reconnect hoses and close taps.
