They also have over one hundred different special collections ranging from American Lit to Western Philosophy. Worth a look.

Self Efficacy Toward A Unifying

Self-efficacy: toward a unifying theory of behavioral change. The present article presents an integrative theoretical framework to explain and to predict psychological changes achieved by different modes of treatment.

[PDF] Self-efficacy: toward a unifying theory of ...

This theory states that psychological procedures, whatever their form, alter the level and strength of self-efficacy. It is hypothesized that expectations of personal efficacy determine whether coping behavior will be initiated, how much effort will be expended, and how long it will be sustained in the face of obstacles and aversive experiences.

Self-efficacy: Toward a unifying theory of behavioral ...

Since Bandura published his seminal 1977 paper, "Self-Efficacy: Toward a Unifying Theory of Behavioral Change," the subject has become one of the most studied topics in psychology. Why has self-efficacy become such an important topic among psychologists and educators?

Self Efficacy and Why Believing in Yourself Matters

Self-efficacy theory (SET) was first developed in 1977 by Albert Bandura. He first presented his theory in the Journal of Psychological Review. Titled "Self-Efficacy: Toward a Unifying Theory of Behavioral Change," he proposed SET as the determining force of behavior change. Clearly, behavioral change plays a big part in both nursing education and nursing care.

Publications by Professor Bandura

Self-efficacy is, according to psychologist Albert Bandura who originally proposed the concept, a personal judgment of "how well one can execute courses of action required to deal with prospective situations".. Psychologists have studied self-efficacy from several perspectives. Educator Kathy Kolbe adds, "Belief in innate abilities means valuing one's particular set of cognitive strengths.
