Windows XP Professional, I can select 1152x864x32 and it works quite well! As you know, xp detects and installs geforce2 with its own driver. But when I install the drivers from nvidia site, and use them, the 1152x864 resolution disappears in properties screen. So the problem is, my monitor supports 1152x864.

resolution on one of my network computers keeps resetting back to 800x600 from 1024x768. I'm using a Nvidia FX5200 video card and I've downloaded new drivers at least twice in recent months. The change in resolution seems to happen (sometimes) when I boot up (never seen it happen while I was using the computer).
